Dr. Kerri Zeleniak
Assistant Principal

The Creative Curriculum for Preschool

The Commercial Township Preschool Program uses *The Creative Curriculum® for Preschool*, as required by the New Jersey Department of Education Preschool Guidelines. *The Creative Curriculum* empowers children to become confident, creative, and caring learners through play-based, hands-on investigations. This research-based approach weaves language, literacy, and mathematics into everyday learning.

The Creative Curriculum promotes a whole-child approach to learning by supporting development in all areas: social-emotional, cognitive, language, literacy, math, and science. This developmentally appropriate model helps prepare children for a successful transition to kindergarten.

Through meaningful, play-based experiences rooted in topics from children's everyday lives, students build academic skills such as counting, measurement, and language comprehension. At the same time, they develop essential life skills like problem solving, gross-motor coordination, and positive relationships. *(Teaching Strategies, 2020)*
