District/School Writing Tasks

Primary Focus

This is connected to the types of writing as indicated in the standards: Informational or Literary.

- Participate in discussions with diverse partners about the informative and instructional nature of how-to texts and their features.
- Understand that steps in a process are sequenced chronologically.
- Name a topic and supply procedural information about that topic.
- Make choices about audience, purpose and structure.
- Publish a how-to book, using a combination of drawing and writing to inform and explain a familiar procedure or process to an audience of readers.

Secondary Focus

This may be to develop a skill or connect to writing from resources or research writing.

- Consider how some words convey actions (verbs) and others convey time (transitions).
- Participate in shared research as they learn about different types of informative and procedural writings and their features (e.g. recipes, instructions, directions, steps in a process, a sequence of events, etc.).

Routine Writing

This is daily writing or writing that is done several times over a week.

- Personal narrative functional
- Journal writing
- Reading responses
- Word Wall writing activities
- Graphic organizers
- Writing activities related to word study

Instructional Best Practices and Exemplars

Guided Reading Assessments:

Develop a plan for instruction based on student need and assessment data. Assessment data including word accuracy analysis, fluency and comprehension begins at Level A using the Fountas and Pinnell Benchmark Assessment System and Teachers College Reading Writing Project Reading Assessments .Beginning at level J words per minute must also be calculated and become part of an instructional plan. The writing about reading section is not optional.

Guided Reading Instruction:

First: Preview the book or text by engaging students in a guided picture walk or discussion about specific parts of the text. Preview essential vocabulary and teach them the meanings of those words.(Approx.5 minutes)

Next: Students read the text silently. While students are reading listen to each student read, taking quick anecdotal notes and conferring with the reader giving quick strategies in word study, comprehension and fluency. (Approx.5 minutes)

After: Once students have read the whole or portion of the text, have a quick discussion about the reading followed by a mini-lesson. This mini-lesson should teach a strategy that will help readers in the group not only for this particular book but for other books as well, the goal here is to teach the reader not the book)(Approx. 10min)

Finally: Send students away to practice what was taught in the mini-lesson.

Read Aloud Instruction: During read aloud the teacher has the text and the students listen and participate in discussion at different points throughout the reading. The books or texts can be below, on or above the reading levels of the class because the teacher is reading and the students are engaged in auditory comprehension. When we read aloud we model an enjoyment and love for reading as well as reading with fluency and prosody. Other comprehension skills can be taught during read aloud as well. There is always a delicate balance that must be achieved between stopping to discuss comprehension, characters etc. and reading aloud without ever stopping to engage students about higher order thinking skills.

Achieving this balance comes with experience as a teacher, the students in your class, and the particular book you are reading.

Shared Reading Instruction: During shared reading both the teacher and the students have a copy of the text. If the students do not have a copy, then the copy is projected or displayed or is available in a big book format visible to all the students. The books or texts are generally at the grade level for the whole class. When we engage in shared reading we are teaching and modeling various skills, strategies and reading behaviors such as fluency, word study, phonics, grammar and comprehension as well as various features of text both fiction and non-fiction. During this instructional time students can interact with the text, discuss various portions of the text after they have read it, chorally read sections to help with fluency, read, take notes, write and respond to what is being read.

It is important that these sessions do not become read alouds or sessions of students taking turns reading the text out loud. Students need time to practice reading and interacting with the text, so in shared reading all students should be active participants in the process. Often when students take turns reading out loud others who are not reading either tune out or practice for the part they will be called on to read. Teachers can employ various techniques to manage shared reading time to get optimum participation by the class in the reading.

Independent Reading Instruction: Independent reading is so important in developing lifelong readers. Research is clear on this. The more time students spend independently reading, the better they perform academically. During independent reading students have choices in the texts they read with input from the teacher to guide them as readers and to check for appropriate content. Borrowing the best from reading workshop techniques, the following guidelines should be employed:

- Extensive classroom libraries be part of the classroom
- Students each have book bins where they keep a selection of books that range in levels from independent, instructional and books of high interest to the reader.
- Students should keep reading logs that are grade level appropriate for the task of monitoring students reading.
- During independent reading time the teacher should conference with readers, conduct skills group instruction and/or guided reading instruction, or book clubs. There should always be some time set aside in the literacy block to do one on one conferences with readers.

- Teachers should have knowledge of text bands in order to engage in conversations about the books students are reading even if the teacher has not read the book
- Teachers should control access to the classroom library.
- Rules should be established about when books can be abandoned to move on to another choice.
- Teachers should guided students in making selections to ensure students read various genres in both fiction and non -fiction books.

Classroom Libraries

The common belief among reading professionals is that when a teacher begins a reading workshop format it starts with the classroom library . For independent reading to work like a well oil machined, there needs to be a well organized, well equipped library with a system in place for ongoing use in service of independent reading. Part of our mission as educators is to match readers with books. The following guidelines will help you create and organize a great classroom library:

Libraries should be organized by genre and by guided reading level. It is advisable to place the guided reading level inside books organized by genre. books can be organized in bins or sections on shelves. The following are some genres to choose from:

- Author collections
- Transportation
- Aeronautics and space
- Sports
- Animals
- Character building
- Personal narrative writing
- Poetry
- Family
- Immigration
- World cultures
- Funny/humorous
- Holidays
- Mystery
- Travel
- History
- Realistic Fiction
- Fairy tales and nursery rhymes
- Chapter book series
- Seasons
- Newspapers and magazines
- Big Books

- Biographies Cooking and Crafts
- School life
- Plays and Reader's Theatre scripts
- Teacher Picks
- Student Picks

Libraries should also include books organized by guided reading level. This will help both students and the teacher make choices for independent reading by level not genre which can be beneficial matching a student to books they will be successful reading. The range of levels should not be limited to the guided reading levels for the particular grade the library is in.

- Plan for both below level and above grade level readers when organizing books by level.
- A range of four to five letter levels above and below each grade level text gradient is recommended
- Place each level in a separate book bin
- Label each book for fiction/non-fiction and level

Student Book Bins

Each student should have their own personal book bin or bag. In this book bin would include books at the independent, instructional and student choice books. It is common in kindergarten and first grade to have as many as 8 to 10 books in their bins. Because the books get longer as students move up through the grades ,the numbers of books in each bin often drop so that in 5th grade and above you may see a number closer to 3 or 4.

Classroom Library Management

It is recommended that the teacher be a "gatekeeper" to the library guiding students in book choices and using the student's reading log as a guide. The library does not need to be open every day because students have book bins and their are rules in place about library use. Various reasons for having a management system in place as well as suggestions are as follows:

- Maintain the organization of the library and book bins within
- Ensure students make thoughtful choices about books and that they read through the books in their bins.
- Have rules set up for the class about abandoning books before they are finished. For chapter books, as an example, it is common to require a student to read at least 60 pages before they abandon the book.
- Teachers can make suggestions for books that might be of interest to the students as well as provide academic support for their reading. An example would be encouraging a student who is having trouble with fluency to have a greater selection of independent level books in their book bin.
- Teacher can also monitor if a student is not getting a variety of genres read. If a student is always reading fiction it is important that the teacher help them make choices that would help them get more experience in non-fiction etc.
- Students should have grade level appropriate reading logs for both in school and at home reading.

Word Walls: Word walls are an integral part of literacy instruction. In best design they are interactive not wallpaper. The word walls should be set up using the following guidelines:

- Enough space should be provided to accommodate approximately 125 words and with the alphabet letter at the top of each column.
- In some cases sentences words or pictures can be added to the cards.
- For grades K-6 the primary focus is using high frequency words developed for each grade level.
- Words are placed on the word wall only after they have been taught.
- For grade K words should be taught at the rate of 4 words per week. For grades 1 through 6 the rate should be 5 or 6 words per week.
- Word walls should be interactive so that students can remove words and bring them to their desks during independent reading and writing.
- For the most common words used by your student writers have multiple copies of the word available. Using a push pin and have the word cards "hang" off the pin works best.
- Model the use of the word wall consistently throughout the year.

Writer's Workshop Basics

The main objective in writing workshop is to teach a short mini lesson on writing followed by giving students ample time to write while you conference with individual writers or sometimes groups of writers.

- 45 minutes is the minimum time you need, 60 minutes is ideal
- Keep your mini lessons short, ten to fifteen minutes.
- All materials should be easily accessible to students
- Students should write with pens
- All work should be dated
- Writing should be kept in student folders, one side "Work in Progress" the other side "Completed Work".
- Students choose the topics they write about within the genre being studied.
- Teacher conferences with students one at a time unless conferencing with a small group who share the same specific need.
- Teacher keeps short anecdotal notes about conference content and dates.
- One or two students are chosen by teacher at the end of the day's workshop to share all or just a small part of their writing.
- Students should always be writing in "stapled books" of 4 to 5 pages. These can be available in an assortment of paper styles appropriate for student needs and grade level.

Architecture of a Writing Conference: Teaching for a Lifetime of Writing

Often referred to as the *heart and soul* of the writing workshop, conferencing with writers is an art. Effective conferencing will be the difference between students who grow as writers in giant steps and those that make only modest gains along the way. Conferencing with individual writers is

how we truly differentiate instruction for each writer. Conferencing should be collegial, one writer talking to another not teacher talking to student. There are four phases to a writing conference as researched and developed by the Reading Writing Project at Columbia University.

Research : In this first phase of conferencing the teacher wants to be “present as a reader” reacting to the writing you are hearing or reading by the student with genuine amazement and interest. Often a conference starts with language such as “ what are you working on as a writer today ?” or “How is your writing work going?” While you are engaged in the writing and talking to the student , you are trying to get a sense what the child has done as a writer, and also naming for the student what they are trying to do. “I see you are trying to help your reader keep the story organized by using paragraphs, here you started a new one because there is a change of location in the story.” In this phase of conferencing there are a lot of research questions and dialogue about the writing.

Compliment: Every writer needs encouragement. Let the student know something that he or she is doing well, encouraging them as writers .

Decide: Now it is time to decide whether to accept or alter the student’s plan and to make a decision about how to move this writer forward in their development as a writer. This process is not out loud but happening in the head of the teacher as you research and discuss the writing with the student. Think to yourself, “how can I help this particular writing piece while at the same time helping this particular writer?” There may be many things wrong with the writing but here you are going to pick out one thing and one thing only , so make it count!

Teach: Once the decision is made about what to teach the conference time now resembles more of a mini lesson. As in the min lessons for the day , it is best practice to explicitly tell the students what you will teach them today. “ I notice that you have a few different characters in your story and the setting is important to the story. Good writers can help their readers by crafting leads that give information right away that will help place them in the story. Today I am going to teach you some of the things that great writers include in their leads to help their readers.” In teaching the student a teacher can use demonstration, guided practice and/or explicitly telling or showing.

Some additional best practices when conferring with writers:

- Always try to go to the student not have the student come to you.
- Although at times you can do group conferences to help all the students in the group who have a common need, conferences are primarily one to one.
- Having a small stool on the classroom that you can maneuver and use to sit down next to the student is advisable.
- Conference about one thing, do not overwhelm the writer.
- Keep a conference log for each student and bring with you to a conference.
- Always bring your writer’s notebook and conference log to a conference.
- Spend about 4 to 5 minutes with each student.
- Record on the conference sheet what you might conference about next time.

Within Unit 3:Nature/Animals, there will be many opportunities for the students to learn through interdisciplinary connections. Students will be reading a multitude of stories which are cross-curricular in nature. While studying this unit, students will be learning about the 5 Core Competencies through comparing a character's social and emotional development to their own. These lessons are geared toward building understanding and positive relationships between themselves, each other, and their teachers. This can be portrayed through Writer's Workshop lessons, or in personal journaling, Art, or Music.

Integration of 21st Century Life and Career Standards

Mission: 21st century life and career skills enable students to make informed decisions that prepare them to engage as active citizens in a dynamic global society and to successfully meet the challenges and opportunities of the 21st century global workplace.
